

## Grade 3 October Newsletter

Grade 3 have enjoyed working on projects and would like to share their work. Their projects were proudly displayed at our recent festival. We hope you enjoy them.

We researched the the Gang Gang Cockatoo and learnt they live in the cooler and wetter forests of Australia. Our group felt excited but tired.

We researched the Black Swan and learnt a group of swans is called a bank. Our group felt good because we learnt a lot.

We researched the Brolga and learnt that a fully grown Brolga's wing span is 1.7m to 2.4m .  
Our group felt confident working together.

We researched the Emu and learnt emus can drink up to 18 litres of water per day .  
Our group enjoyed working together doing our project.

We researched Leafy Seadragon and learnt that the Leafy Seadragon can't chew. Our group felt it was slightly stressful but we enjoyed the project.

We researched the Whale Shark and learnt that the scientific name for the Whale Shark is Rhincodon Typus. Our group thought it was fantastic.

We researched the Koala and learnt the Koala's bony bottoms help them sit in trees.  
Our group had fun working together because we have never worked together before.

We researched the Kookaburra and learnt they don't laugh because they see something funny but because they are marking their territory. Our group enjoyed learning about the Laughing Kookaburra.

We researched the Blue Groper and learnt they are all born Female. Our group felt proud of our work.

We researched the Common Brushtail Possum and learnt it breeds in Autumn. Our group felt like we learnt something.

We researched Anemone Fish and learnt that Anemone Fish lay more than 100 eggs. Our group felt excited and happy.

We researched the Red Kangaroo and learnt that they are really good swimmers. Our group thought it was very interesting.

We researched the Wombat and learnt that they have cube shaped poo. Our group worked really well together and had lots of fun.

We researched the Platypus and learnt that the Platypus does not have a stomach. Our group felt proud.

We researched the Wedge Tailed Eagle and learnt Wedge Tailed Eagles can fly 6 km's high. Our group loved our animal and we learnt a lot about the Wedge Tailed Eagle.

We researched the Numbat and learnt they only live up to 5 years. Our group felt happy.

We researched the Tasmanian Devil and learnt that the Tasmania Devil can also be called 'Imps'. Our group felt happy doing this project.
